

Python Programming Questions

Question 1: Triangle Formation Check

Write a Python program to check whether three given sides form a triangle or not.

Sample Input:

Enter the first side of a triangle (in cm): 3
Enter the second side of a triangle (in cm): 4
Enter the third side of a triangle (in cm): 5

Sample Output:

First side : 3 cm
Second side : 4 cm
Third side : 5 cm
The three sides form a triangle

Question 2: Types of Triangle

Write a Python program to determine whether a triangle is Equilateral, Isosceles, or Scalene.

Sample Input:

Enter the first side of a triangle (in cm): 5
Enter the second side of a triangle (in cm): 5
Enter the third side of a triangle (in cm): 5

Sample Output:

First side : 5 cm
Second side : 5 cm
Third side : 5 cm
The three sides form an equilateral triangle

Question 3: Simple Calculator

Write a Python program to perform addition, subtraction, multiplication, and division using if-elif-else.

Sample Input:

Enter the first number: 10
Enter the second number: 5
Enter the operator (+, -, *, /): *

Sample Output:

The product of 10 and 5 is: 50
